

2725ARL JET FILL TENSIO METERS

DESCRIPTION

Jet Fill Tensiometers, come in lengths from 6 inch (15 cm) to 60 inches (152 cm), and a standard 1 bar gauge. Features the Jet Fill reservoir for push-button convenience and minimization of soil disturbance when servicing is required. Unique modular construction allows for easy replacement of the porous ceramic cup and dial gauge and adaptation of extensions for flexibility and variety in use. Series 0240 Insertion Tools can be used to core a hole to accept these units

The 2725ARL Series can be purchased with a ½ Bar Gauge or without any gauge

Specifications

Weight: 0.76 lbs.

Dimensions: Tensiometers come in different lengths (6, 12, 18, 24, 36, 48 and 60" long).

2725ARL JET FILL TENSIO METERS:

Features the Jet Fill reservoir for push-button convenience and minimization of soil disturbance when servicing is required. Unique modular construction allows for easy replacement of the porous ceramic cup and dial gauge and adaptation of extensions for flexibility and variety in use. Series 0240 Insertion Tools can be used to core a hole to accept these units hose with stainless steel braids, and an external Pressure Regulator, preset at the factory for the maximum operating pressure of 25 bar (2.5 MPa).
